- Surface hardness: 58±2 HRC
- Surface roughness: Ra: max. 0.32 µm
- Length tolerance: ±200 mm
- Surface hardening depth, SHD: according to EN ISO 15787
- On request: special lengths, tolerances and dimensions
- Additional chrome plating on request

- *The hardening depth (SHD according to EN ISO 15787 or Rht according to DIN 6773) is defined as the distance from the steel surface up to the point where the hardness value is 80% of the minimum guaranteed value of the surface hardness and it is established in accordance with ISO 13012, depending on the shaft's size.*
- *The minimum guaranteed value of the surface hardness varies between the steel grade.*
