NICKEL-CHROME PLATED
STEEL BARS

NiCro NCB - C45E / C35E
NiCro NCBM - 20MnV6 / 38MnVS6
NiCro NCBV - 42CrMo4+QT

In choosing the right product for an application, there are certain aspects to be taken into consideration. Both the properties of the base material and those of the finished surface are of crucial importance in delivering the optimal solution. The questions to be answered in making the correct decision are:

- What is the product that best fits the application's function and its technical requirements?
- What is the most effective cost-wise solution?
- Which is the product with the less long term impact on the environment?

STEEL GRADE

20MnV6 steel grade offers good weldability, enhanced mechanical characteristics, impact resistance at lower temperatures (-20°C).

38MnVS6 has excellent machinability, good weldability and it is widely used in civil, mechanical and chemical engineering applications.

42CrMo4 steel has high hardenability and is an excellent material for the oil and gas industry, mining and automotive engineering.

	NSS	AASS	NSS	AASS	NSS	AASS
Ø20 - 160	rating 10 after 500 h	rating 10 after 150h	rating 10 after 1000 h	rating 10 after 350h	rating 10 after 1500h	rating 10 after 500h

Tested in our own laboratory according to ISO 9227, evaluated according to ISO 10289.

The nickel layer is completely free of cracks, pores and by this, the base material is isolated from the atmospheric corrosion, while the chrome layer ensures a very good wear resistance.

STORAGE AND HANDLING RECOMMENDATIONS

- Keep the products stored in dry and covered spaces.
- Do not expose for a long time the bars or tubes to the sunlight or to very low temperatures.
- For storage, preferable to use rubber supports or wood lined supports; direct contact with the floor and steel supports that are not lined with soft materials must be avoided.
- Whenever possible, please use the crane to load or unload the bundles; when you use the fork lifts please avoid the direct contact of the forks with the products.
- Always lift the bundles using textile slings. Don't use metal slings during handling of bundles.
- Always keep dry the cardboard tubes that protect the chromed products.
